Lesson Seven Credit

overview

In today's world, credit is integrated into everyday life. From renting a car to reserving an airline ticket or hotel room, credit cards have become a necessary convenience. However, using credit wisely is critical to building a solid credit history and maintaining fiscal fitness. While most students have a general idea about the advantages and disadvantages of credit, this lesson provides an opportunity to discuss these issues in more detail.

Young people and others commonly wonder how to establish credit. In this chapter, students will learn about the creditworthiness factors of character, capital, and capacity in order to help them gain an understanding of how to start and maintain a credit record.

This chapter will also introduce students to different types of credit: single-payment credit, installment credit, and revolving credit. Finally, this section will educate students about how much credit might be appropriate for their situation.

how much debt can they safely carry? answer key

Most people can afford a certain amount of credit and stay within a safe budget. This amount is called a "safe debt load." The following exercises will give you practice determining safe debt loads based on various incomes and fixed expenses.

directions

Read each of the following scenarios and determine the largest amount of debt each person can safely carry. Write your answers in the blanks provided. Use the space below each question to show how you arrived at each answer.

1. David has a monthly net income of \$1,360. His fixed monthly expenses consist of a rent payment of \$450. He is paying off a student loan of \$116 per month.

David would like to buy a new television set using a credit card. What is the largest monthly payment David can afford for the television set so that his credit card payments and student loan keep his monthly payments within a safe range 10% of his income?

```
$20.00
$1,360 x 10% = $136
$136 - $116 = $20
```

2. Marsha and Michael have a combined monthly net income of \$3,500. Their fixed monthly expenses consist of \$675 for rent. They also have an outstanding student loan balance of \$6,000 and a balance of \$1,000 for the stereo they bought last month.

How much more debt can they take on and still be within a safe debt load?

```
$1,400.00

$3,500 x 12 = $42,000

$42,000 x 20% = $8,400

$8,400 - $6,000 - $1,000 = $1,400
```

3. Juanita has a monthly net income of \$2,500. Her fixed monthly expenses consist of \$500 for rent. She also pays a car insurance premium of \$68 and a car payment of \$167. Are these payments within Juanita's safe debt load?

```
Yes
$2,500 x 10% = $250
$250 - $167 - $68 = $15
```
